

Photography at :

From time to time photographs are taken during services and parish events to document, record and share activities which take place within the parish. These photographs may be used in the parish newsletter, website and social media as well as in diocesan and central church media and may be sent to local or national media for the purpose of documenting parish events.

To ensure we are compliant with the Data Protection Act 2018 (incorporating the General Data Protection Regulation - GDPR) the following procedure will apply:

- Where a photograph can clearly identify you the photographer will seek your consent to use this photograph for the reasons outlined above.
- Where a photograph cannot clearly identify you (ie in a crowd shot) we can use this photograph within the legitimate interest of recording the parish event.

Who to contact:

If you do not wish your photograph to be taken or used in the manner outlined above or if you have any questions about how the photographs will be used please contact the Rector or a member of the parish team.
